Re: Lake Calumet Cluster Site in Chicago, Illinois  
General Notice of Potential Liability

Alburn Incinerator, Inc., U.S. Drum and Un-named Parcel  
Owners, Operators, Generators, and Transporters

Dear Sir or Madam:

The United States Environmental Protection Agency (U.S. EPA or Agency) has documented the release or threatened release of hazardous substances, pollutants and contaminants at the above-referenced facility (Site), and is planning to spend public funds to control and investigate these releases. This action will be taken by U.S. EPA pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), 42 U.S.C. § 9601 et seq., as amended by the Superfund Amendments and Reauthorization Act of 1986, Pub. L. No. 99-499, 100 Stat. 1613 (1986) (SARA), unless U.S. EPA determines that such action will be done properly by a responsible party. Responsible parties under CERCLA include the current and former owners and operators, and persons who generated the hazardous substances or were involved in transport, treatment, or disposal of them at the Site. Under Section 107(a) of CERCLA, 42 U.S.C. § 9607(a), where the Agency uses public funds to achieve the cleanup of the hazardous substances, responsible parties are liable for all costs associated with the removal or remedial action and all other necessary costs incurred in cleaning up the Site, including investigation, planning and enforcement.

The U.S. EPA is currently in the process of listing the Lake Calumet Cluster Site on the National Priorities List. U.S. EPA is also prepared to explore other ways of addressing the threats posed by the Site.

The U.S. EPA has information that you may have owned or operated or generated or transported hazardous substances that were disposed of at the Site. By this letter, U.S. EPA notifies you of your potential liability with regard to this matter and encourages you, as a potentially responsible party, to reimburse U.S. EPA for costs incurred to date and to voluntarily perform or finance the response activities that U.S. EPA has determined or will determine are required at the Site.

The U.S. EPA would like to encourage good faith negotiations between you and the Agency and among you and other potentially responsible parties (PRPs) for the Site. To assist the PRPs in negotiation with U.S. EPA concerning this matter, attachment 3 to this notice is a list of the names and addresses of other PRPs to whom this notice has been sent. This list is provided to assist you in contacting other PRPs in this matter and to negotiate with U.S. EPA.

Enclosed also is a U.S. EPA Small Business Regulatory Enforcement Fairness Act Information Sheet (Attachment 2). The information sheet may be helpful if you are subject to enforcement action by U.S. EPA and you are a qualified small business.

As a PRP, you should notify U.S. EPA within sixty (60) days after receipt of this letter, in writing, of your willingness to perform or finance the activities described above. If U.S. EPA does not receive a timely response, then U.S. EPA will assume that you do not wish to negotiate a resolution of your potential responsibility in connection with the Site and that you have declined any involvement in performing the response activities.

Your letter should indicate the appropriate name, address, and telephone number for further contact with you. If you are already involved in discussions with state or local authorities, engaged in voluntary cleanup action, or involved in a lawsuit regarding this Site, you should continue such activities as you see fit. This letter is not intended to advise you or direct you to restrict or discontinue any such activities; however, you are advised to report the status of those discussions or actions in your response to this letter and to provide a copy of your response to any other parties involved in those discussions or actions.

The U.S. EPA invites you to participate in formal negotiations with U.S. EPA to reach settlement providing for the PRPs, including yourself, to conduct or finance the response activities required at the Site.

Send your response to the notice of potential liability within 60 days after the date of this letter. Send your response to:

U.S. Environmental Protection Agency  
Fouad Dababneh, SR-6J  
Remedial Enforcement Support Section  
77 West Jackson Blvd.  
Chicago, Illinois 60604-3590

The U.S. EPA has established a toll-free "hotline" where PRPs can obtain additional information about this matter. Call (866) 575-8543 to obtain additional information or to leave a message. A U.S. EPA representative will return your call.

Enclosed is a copy of a First Point of Contact Letter sent to the Un-named parcel owners area of the Site.

An informational meeting regarding the site is scheduled to take place on December 5, 2003, at 10:00 a.m., at U.S. EPA's office at 77 West Jackson Blvd., Lake Michigan conference room, 12<sup>th</sup> floor. During the informational meeting, U.S. EPA will discuss the status of the Site cleanup, as well as ways of addressing the future work.

Sincerely,

 Wendy L. Carney, Chief  
Remedial Response Branch #1

## **ATTACHMENT 1**

### **SITE HISTORY**

#### **Lake Calumet Cluster Site Chicago, Illinois**

The Lake Calumet Cluster Site consists of areas of both ground water and surface water contamination located in a remnant wetland area adjacent to Lake Calumet in southeastern Chicago, Cook County, Illinois. This wetland area, which was originally approximately 200 acres in size, is bordered by the Interlake/Big Marsh property and Paxton I to the north, Stony Island Avenue to the west, the Norfolk and Western Railroad right-of-way to the east and Land & Lakes and the 122<sup>nd</sup> Street to the south. U.S. EPA's effort at this site is part of a larger effort undertaken by U.S. EPA, the State of Illinois, the City of Chicago, the U.S. Army Corps of Engineers, and the Department of Energy to cleanup contamination in the Lake Calumet basin.

The original wetland area has been partially filled by various waste handling and disposal activities. These activities, which started as early as the 1940s, have included mixed waste land-filling, drum recycling, and incineration. Several landfills operated in and near the Site from 1967 into the 1990s. Incineration of hazardous waste including paints, thinners, varnishes, chlorinated solvents, styrene, ink, adhesives, and antifreeze occurred on the Site from 1977 until 1982. Approximately 1,500 ruptured drums were discovered buried on the Site. The U.S. EPA has undertaken or overseen various response actions at the Site to mitigate remaining above ground contamination in the Site vicinity.

These activities have led to the formation of an extensive ground water contamination plume and contamination in the remaining wetland. The origin of the contamination cannot be associated with any single prior activity. The ground water is in direct contact with the wetland waters, and the same contaminants of concern, including metals such as copper, lead, arsenic, and zinc, and organics such as 4,4'-DDD, benzene, and anthracene, are found in each media. Many of these substances are known to bioaccumulate and their concentrations are above human health and environmental standards.

The industrial history of the Site and surrounding areas has produced an ecological system that differs significantly from the native wetland that existed previous to the waste operations. The extensive wetlands that existed previously in the area are now present only in small pockets. These wetlands provide

habitat for 14 state-listed endangered species. Approximately 200 species of bird have been observed, with up to 71 potentially breeding in the area. Two federal species of concern have been seen in the area. The wetlands are adjacent to other wetland areas that have been set aside for wildlife refuges and other uses, such as open public area. Specifically, an ecological park has been proposed for the area to conserve the environment and preserve historical landmarks.

The Illinois Environmental Protection Agency (Illinois EPA) has reviewed the Hazard Ranking System (HRS) scoring package to propose the Site for inclusion on the NPL. The U.S. EPA has maintained close communications with Illinois EPA throughout the evaluation and development processes.

## U. S. EPA Small Business Resources

If you own a small business, the United States Environmental Protection Agency (EPA) offers a variety of compliance assistance and tools to assist you in complying with federal and state environmental laws. These resources can help you understand your environmental obligations, improve compliance and find cost-effective ways to comply through the use of pollution prevention and other innovative technologies.

### Hotlines, Helplines and Clearinghouses

EPA sponsors approximately 89 free hotlines and clearinghouses that provide convenient assistance regarding environmental requirements.

**The National Environmental Compliance Assistance Clearinghouse** provides quick access to compliance assistance tools, contacts, and planned activities from the U.S. EPA, states, and other compliance assistance providers: <http://www.epa.gov/clearinghouse>

**Pollution Prevention Clearinghouse**  
<http://www.epa.gov/opptintr/library/ppicindex.htm>

**EPA's Small Business Ombudsman Hotline** can provide a list of all the hot lines and assist in determining the hotline best meeting your needs:  
(800) 368-5888

**Emergency Planning and Community Right-To-Know Act**  
(800) 424-9346

**National Response Center** (to report oil and hazardous substance spills)  
(800) 424-8802

**Toxics Substances and Asbestos Information**  
(202) 554-1404

**Safe Drinking Water**  
(800) 426-4791

**Stratospheric Ozone and Refrigerants Information**  
(800) 296-1996

**Clean Air Technology Center**  
(919) 541-0800

**Wetlands Helpline**  
(800) 832-7828

### EPA Websites

EPA has several Internet sites that provide useful compliance assistance information and materials for small businesses. If you don't have access to the Internet at your business, many public libraries provide access to the Internet at minimal or no cost.

**EPA's Home Page**  
<http://www.epa.gov>

**Small Business Assistance Program**  
<http://www.epa.gov/ttn/sbap>

**Office of Enforcement and Compliance Assurance**  
<http://www.epa.gov/compliance>

**Compliance Assistance Home Page**  
<http://www.epa.gov/compliance/assistance>

**Office of Regulatory Enforcement**  
<http://www.epa.gov/compliance/civil/index.html>

**Office of Site Remediation Enforcement**  
<http://www.epa.gov/compliance/cleanup>

**Innovative Programs for Environmental Performance**  
<http://www.epa.gov/partners>

**Small Business Ombudsman**  
[www.sba.gov/ombudsman](http://www.sba.gov/ombudsman)

### Compliance Assistance Centers

In partnership with industry, universities, and other federal and state agencies, EPA has established national Compliance Assistance Centers that provide Internet and "faxback" assistance services for several industries with many small businesses. The following Compliance Assistance Centers can be accessed through the Center's gateway at <http://www.assistancecenters.net> or by calling the phone numbers below and at their respective websites:

#### Metal Finishing

(1-800-AT-NMFRC or [www.nmfrc.org](http://www.nmfrc.org))

#### Printing

(1-888-USPNEAC or [www.pneac.org](http://www.pneac.org))

#### Automotive Service and Repair

(1-888-GRN-LINK or [www.ccar-greenlink.org](http://www.ccar-greenlink.org))

#### Agriculture

(1-888-663-2155 or [www.epa.gov/agriculture](http://www.epa.gov/agriculture))

#### Printed Wiring Board Manufacturing

(1-734-995-4911 or [www.pwbr.org](http://www.pwbr.org))

#### The Chemical Industry

(1-800-672-6048 or [www.chemalliance.org](http://www.chemalliance.org))

#### The Transportation Industry

(1-888-459-0656 or [www.transource.org](http://www.transource.org))

#### The Paints and Coatings Center

(1-800-286-6372 or [www.paintcenter.org](http://www.paintcenter.org))

Three new centers are under development for the auto salvage sector, the construction industry, and U.S. Mexican border waste issues.

### State Agencies

Many state agencies have established compliance assistance programs that provide on-site and other types of assistance. Contact your local state environmental agency for more information. For assistance in reaching state agencies, call EPA's Small Business Ombudsman at (800)-368-5888 or visit the Small Business Environmental Homepage at <http://www.smallbiz-enviroweb.org/state.html>.

### Compliance Incentives

EPA provides incentives for environmental compliance. By participating in compliance assistance programs or voluntarily disclosing and promptly correcting violations, businesses may be eligible for penalty waivers or reductions. EPA has two policies that potentially apply to small businesses: The Audit Policy (<http://www.epa.gov/compliance/incentives/auditing>) and the Small Business Policy (<http://www.epa.gov/compliance/incentives/smallbusiness>).

These do not apply if an enforcement action has already been initiated.

### Commenting on Federal Enforcement Actions and Compliance Activities

The Small Business Regulatory Enforcement Fairness Act (SBREFA) established an ombudsman ("SBREFA Ombudsman") and 10 Regional Fairness Boards to receive comments from small businesses about federal agency enforcement actions. The SBREFA Ombudsman will annually rate each agency's responsiveness to small businesses. If you believe that you fall within the Small Business Administration's definition of a small business (based on your North American Industry Classification System (NAICS) designation, number of employees or annual receipts, defined at 13 C.F.R. 121.201; in most cases, this means a business with 500 or fewer employees), and wish to comment on federal enforcement and compliance activities, call the SBREFA Ombudsman's toll-free number at 1-888-REG-FAIR (1-888-734-3247).

Every small business that is the subject of an enforcement or compliance action is entitled to comment on the Agency's actions without fear of retaliation. EPA employees are prohibited from using enforcement or any other means of retaliation against any member of the regulated community because the regulated community previously commented on its activities.

### Your Duty to Comply

If you receive compliance assistance or submit comments to the SBREFA Ombudsman or Regional Fairness Boards, you still have the duty to comply with the law, including providing timely responses to EPA information requests, administrative or civil complaints, other enforcement actions or communications. The assistance information and comment processes do not give you any new rights or defenses in any enforcement action. These processes also do not affect EPA's obligation to protect public health or the environment under any of the environmental statutes it enforces, including the right to take emergency remedial or emergency response actions when appropriate. Those decisions will be based on the facts in each situation. The SBREFA Ombudsman and Fairness Boards do not participate in resolving EPA's enforcement actions. Also, remember that to preserve your rights, you need to comply with all rules governing the enforcement process.

*EPA is disseminating this information to you without making a determination that your business or organization is a small business as defined by Section 222 of the Small Business Regulatory Enforcement Fairness Act (SBREFA) or related provisions.*

Re: Lake Calumet Cluster Site in Chicago, Illinois

Un-named Parcel Owners

Dear Sir or Madam:

The United States Environmental Protection Agency (U.S. EPA or Agency) is currently working to clean up the Lake Calumet Cluster Site (the Site) which is a Superfund Site located in Chicago, Illinois. The Site is comprised of three adjacent properties including Alburr Incinerator, Inc., U.S. Drum II, and Un-named parcel (made up of undeveloped individual residential sized lots).

Superfund is a federal program administered by the U.S. EPA that is designed to clean up hazardous substances (waste) that may pose a threat to human health or the environment. (The full name of the Superfund law is the Comprehensive Environmental Response, Compensation, and Liability Act, or CERCLA). Enclosed is a fact sheet with further information about the Site and U.S. EPA's efforts to date.

The U.S. EPA is sending this letter to you because you are a potentially responsible party based on the fact that you currently own a parcel(or parcels) of land within the Site boundary (specifically, one or more of the residential sized lots that make up the un-named parcel), See Attachment 5 . The Lake Calumet Cluster Site was used for landfilling operations between 1967 and 1977. Wastes were reportedly disposed of in excavated pits and trenches on the Site.

Enclosed is a U.S. EPA Small Business Regulatory Enforcement Fairness Act Information Sheet (Attachment 2). The information sheet may be helpful if you are subject to enforcement action by U.S. EPA and you are a qualified small business.

Under the Superfund program, U.S. EPA has the authority to take actions at sites such as Lake Calumet Cluster Site to protect public health, welfare, and the environment. In addition, this law permits U.S. EPA to request that parties who are owners of the Site to cooperate with the clean up and, where appropriate, to pay for the clean up of the site.

### Potentially Responsible Parties

Those parties who may be responsible for the waste at sites are referred to as potentially responsible parties or Superfund PRPs. PRPs include individuals, businesses, governmental agencies, and other types of organizations. You may be a PRP if you are:

- 1) a current owner or operator of the site;
- 2) a former owner or operator of the site during the period of waste disposal;
- 3) a party that arranged for the treatment, disposal, or transportation of hazardous substances to the site; or
- 4) a party that transported hazardous substances to a site you selected.

### Settlements

Because U.S. EPA believes you are a current owner of parcel(s) of land within the Site, you may be considered a PRP. Under Superfund, EPA may offer settlements to PRPs, which provide many benefits to settling parties. Through a settlement, you receive:

1. **"Covenant Not to Sue"** - This provision is a promise that the U.S. EPA will not bring any future legal actions against you regarding the site and the specific matters named.
2. **"Contribution Protection"** - This provision offers you protection from being sued by **other** PRPs at the site. Frequently, major waste contributors will sue many small waste contributors or owners to recover cleanup costs. A settlement provides protection from such suits that extends to all issues covered by the settlement. The amount a settlor may pay as part of the settlement varies from site to site.

Taken together, contribution protection, the covenant not to sue, and other settlement terms can provide you with a high level of certainty that your responsibility at the Site is fulfilled, and that you are protected from future legal actions related to the matters addressed in the settlement.

#### Information to Assist Potentially Responsible Parties

The U.S. EPA encourages good faith negotiations between PRPs and U.S. EPA, as well as among PRPs. To assist in this effort, we have attached a list of the names and addresses of individuals who have received this letter, because they are potentially responsible for cleaning up the waste at the Lake Calumet Cluster Sites. It may be useful to talk to or meet with other parties at the site before talking to U.S. EPA. It is important to note that this list is preliminary; it is **not** a final determination of the parties that may be responsible for the cost of cleaning up the site. U.S. EPA may modify this list of PRPs at any time.

#### Information about the Site

The U.S. EPA encourages you to become familiar with the Site. To assist you in this effort, EPA has compiled certain key documents about the site. Copies of these documents are located at U.S. EPA's Region 5 Office at 77 West Jackson Boulevard, Chicago, Illinois, 60604.

A settlement may be in your best interest. The U.S. EPA encourages you to read carefully the enclosed fact sheet about the Site. The U.S. EPA has established a toll-free "hotline" where PRPs can obtain additional information about this matter. Call 1-866-575-3543 to obtain additional information or to leave a message. A U.S. EPA representative will return your call.

Enclosed is a copy of General Notice Letter sent to operators, owners, generators, and transporters for the Alburn Incinerator, the U. S. Drum, and the Un-named Parcel areas of the Site.

An informational meeting regarding the Site is scheduled to take place on December 5, 2003, at 10:00 a.m., at U.S. EPA's office at 77 West Jackson Blvd., Lake Michigan conference room, 12th floor. During the informational meeting, U.S. EPA will discuss the status of the Site cleanup, as well as ways of addressing the future work.

Sincerely,

  
for Wendy L. Carrey, Chief

Remedial Response Branch #1
